

Commercial Cleaning & Disinfection Services

Why Us?

Illness and infection can cost businesses big, and they disrupt our community, as kids miss school, parents miss work and we all miss out on productivity and living our lives. Having a commercial cleaning partner better positions you to keep facilities open, keep people at work and keep kids in schools. Furthermore, if your facility is under CDC, OSHA or other regulatory parameters, we can help document their building's compliance, supplying monthly cleanliness reports.

How Sprucers Keep Your Buildings Safe

Open Communication

1st - We'll communicate openly with you to understand your cleanliness goals.

Clorox Electrostatic System Spray Down

2nd - During our initial response, we'll spray down the entire facility using our top-of-the-line, Clorox 360 Electrostatic System, which is proven to kill 99.9% of bacteria in just 5 seconds and is registered to kill 44 organisms including Coronavirus, MRSA, Norovirus, and cold and flu viruses in 2 minutes or less.

Wipe Down High-Touch Areas

3rd - After ensuring we've thoroughly covered all necessary areas and high-touch surfaces with disinfectant, we will physically wipe down all high-touch areas, removing unwanted grime, dirt, pathogens and everything else trying to stand in our way of complete disinfection.

Peace-Of-Mind Follow-Ups

4th - We'll provide a follow-up based on any compliance needs or simply ensuring peace-of-mind by completing testing, supplying a cleanliness report and scheduling other appropriate ongoing services.

Together We Can Bring (and Keep) Our Community Together

Outbreaks (coronavirus and otherwise) cause unwanted and sometimes unnecessary disruptions in school, in work and in life. We're happy to help protect your facilities from outbreak by maintaining the highest level of health and safety.

In case of a breakout event...

Here's how we can help reset the environment, disinfect your facility and keep your buildings open and safe for all who enter.

If someone (or multiple people) become ill and you know they have been in your building, do not hesitate to call Spruce, as we can typically have a professional cleaning team at your site the same day.

We'll complete our thorough deep-disinfection process, described in detail on the other side of this sheet.

After we've ensured the cleanliness and safety of your building, we can help document our services and actions to help with any compliance needs, providing a cleanliness report for your documentation.
